

Lower costs
of care for
those in custody

INMATE MEDICAL SERVICE PROGRAM

We've made it easy to save on inmate healthcare.

When your county inmates receive healthcare, your county gets the bill. But a program from ACCG Insurance Programs can help you reduce that bill – *by a lot*.

It's called the Inmate Medical Service Program. It's not an insurance offering – you don't pay premiums to participate – and it's saved counties tens of millions of dollars in healthcare costs.

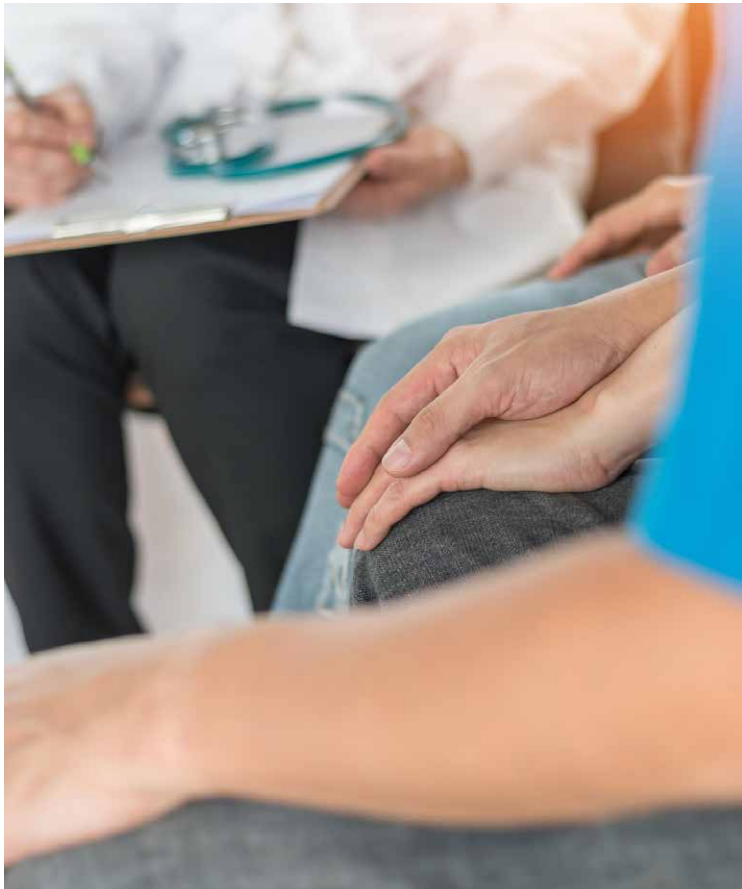

The amount providers charge to treat your inmates for non-emergency care is reduced through our arrangement with Anthem Blue Cross Blue Shield. Here's how it works:

- You submit the bills to Anthem
- Anthem applies its network rate to the healthcare cost – thus lowering the bill
- Anthem then pays that cost and invoices you at the reduced rate, plus a small administrative fee.

More good news – the amount hospitals charge to treat your inmates for emergency and follow-up emergency care can also be reduced. Under Georgia law, the cost of that care is limited to the allowable Medicaid rate – and we help you capture that rate:

- You submit bills for your inmates' emergency and follow-up care to ACCG Insurance Programs
- We then re-price the bills to reflect the Medicaid rate, then return them to you
- You then pay the reduced rate to the provider, as stipulated by Georgia law

On average, this arrangement has lowered emergency and follow-up care for inmates by two-thirds of standard cost of care – an extraordinary savings!

9 out of 10 Georgia counties are enrolled in our Inmate Medical Care program.
